

IntelliGate IP PBX range provides a modular platform which allows you to perform a host of seamless communications operations and optional Unified Messaging:-

The benefits of Unified Messaging with IntelliGate:

- Improved customer satisfaction through better communication
- Manage voice, email and fax with just one "in-box"
- Prioritise all incoming messages
- Control messages, even when on the road or working away from the office
- Remote forwarding and retrieval and response to voice fax and email
- Saves time and cost by efficient use of message retrieval

Unified Messaging functions:

- Full automated attendant
- Text to speech recognition / conversion
- Voicemail, fax and email integration into either Microsoft Outlook or Lotus Notes (V5.0 or above)
- Compatible with Exchange server
- Voice playback (text to speech) of email messages with option to send voice reply as email attachment
- Forward emails as standard wav files to remote users

If you are considering purchasing a new telephone system for your business, why not apply for your **FREE** copy of the 'Buyers Guide to Business Telephone Systems' booklet or contact us (via our website) www.avalontele.com or for further information and advice on **0870 770 0786**

Options described are hardware, license and network (BT) dependent and depend on system configurations, licence allocation and network provision. Screen popping and dialling abilities depend on individual IT/PC/Network configurations, software and licences. Additional hardware (dedicated PC / Server) may be required to run applications. ^Windows and Outlook is a trade mark of Microsoft Corporation.
